

Forward-Citation Candidates
33 documents retained for follow-up assessment

Specific indication marks five documents with a target-specific signal in title/abstract screening. Potentially relevant marks 28 documents with a plausible but unresolved relationship. Neither flag represents full-text confirmation, independent validation, or cross-domain transfer.

Table 1: Forward-Citation Candidates.

Title	Authors	Year	Journal	DOI	Link	Screening flag
GDCEM–DP–TVOC–RRT*: Global path planning for multi-glider multi-target in time-varying ocean currents	Li Y.; Zhou Y.; Juan R.; Wang T.; Li Z.; Liu S.; Shi S.; Gao Z.	2026	Advanced Engineering Informatics	10.1016/j.aei.2026.104968	Scopus	Potentially relevant
Estimation of relative risk, odds ratio and their logarithms with guaranteed accuracy and controlled sample size ratio	Mendo L.	2026	Statistical Papers	10.1007/s00362-026-01803-4	Scopus	Potentially relevant
Power System Reliability Evaluation Based on Monte Carlo Simulation Assisted by Cross-Entropy Method and Convolutional Neural Network	Somchit S.; Kaewdornhan N.; Chatthaworn R.	2026	IEEE Access	10.1109/ACCESS.2026.3679365	Scopus	Potentially relevant
Adaptive sequential selection procedures for optimal quantile with control variates	Tsai S.C.; Jiang G.	2025	European Journal of Operational Research	10.1016/j.ejor.2025.05.049	Scopus	Potentially relevant
Composite reliability evaluation using sequential Monte Carlo simulation with maximum and minimum loadability analysis	Pequeno dos Santos E.; Buss B.S.; da Rosa M.A.; Issicaba D.	2025	Computers and Electrical Engineering	10.1016/j.compeleceng.2024.110023	Scopus	Potentially relevant
MCMC stopping rules in latent variable modelling	Kwon S.; Zhang S.; Köhn H.F.; Zhang B.	2025	British Journal of Mathematical and Statistical Psychology	10.1111/bmsp.12357	Scopus	Potentially relevant
Single criterion for rating confidence interval procedures: a generalization to stochastic stopping rules	Yeh Y.; Tsai S.C.	2025	Journal of the Operational Research Society	10.1080/01605682.2024.2441227	Scopus	Potentially relevant
Adaptive sequential procedures for quantile selection with importance sampling	Tsai S.C.; Jiang G.; Luo J.	2025	IIEE Transactions	10.1080/24725854.2024.2320906	Scopus	Potentially relevant
INVESTIGATION OF DIFFERENT SIMULATION METHODS FOR EXTRACTING RARE FAILURE EVENTS IN POWER SYSTEM RELIABILITY EVALUATION	Oboskalov V.; Timashev S.; Menaem A.A.; Valiev R.; Shmal G.	2024	Reliability: Theory and Applications	10.24412/1932-2321-2024-681-65-76	Scopus	Potentially relevant
Dimensional tolerance optimization of SAR antennas with uncertainty quantification and reliability analysis based on structural-electromagnetic coupling model	Yu D.; Zhao Q.; Yan Y.; Wang S.; Yang Y.; Hong J.	2024	Aerospace Science and Technology	10.1016/j.ast.2024.109412	Scopus	Potentially relevant
Multi-Objective Optimization of Morphology in High-Rise Residential Areas for Outdoor Thermal Comfort in Yulin City, Northwest China	Meng Y.; Hao Y.; Que Y.; Ren J.; Liu Y.	2024	Buildings	10.3390/buildings14061688	Scopus	Potentially relevant
Convergence Diagnostics for Entity Resolution	Aleshin-Guendel S.; Steorts R.C.	2024	Annual Review of Statistics and Its Application	10.1146/annurev-statistics-040522-114848	Scopus	Potentially relevant
On Bounding and Approximating Functions of Multiple Expectations Using Quasi-Monte Carlo	Sorokin A.G.; Rathinavel J.	2024	Springer Proceedings in Mathematics and Statistics	10.1007/978-3-031-59762-6_29	Scopus	Potentially relevant
How Trustworthy Is Your Tree? Bayesian Phylogenetic Effective Sample Size Through the Lens of Monte Carlo Error	Magee A.; Karcher M.; Matsen F.A.; Minin V.M.	2024	Bayesian Analysis	10.1214/22-BA1339	Scopus	Potentially relevant
Composite reliability assessment of systems with grid-edge renewable resources via quasi-sequential Monte Carlo and cross-entropy techniques	Manso B.A.S.; Leite da Silva A.M.; Milhorance A.; Assis F.A.	2024	IET Generation, Transmission and Distribution	10.1049/gtd2.13000	Scopus	Potentially relevant
Sample Size Determination for Two-Stage Multiple Comparisons for Exponential Location Parameters with the Average	Wu S.-F.	2023	Mathematics	10.3390/math11020441	Scopus	Potentially relevant
On Fixed-Accuracy Confidence Intervals for the Parameters of Lindley Distribution and Its Extensions	Bapat S.R.; Joshi N.; Shukla A.K.	2023	Austrian Journal of Statistics	10.17713/ajs.v52i2.1406	Scopus	Potentially relevant
Does change agent selection procedure matter? A strategic decision-making toward a more objective selection approach	Mashhady A.; Khalili H.; Sameti A.	2022	Leadership and Organization Development Journal	10.1108/L0DJ-01-2022-0041	Scopus	Potentially relevant
Markov Chain Monte Carlo in Practice	Jones G.L.; Qin Q.	2022	Annual Review of Statistics and Its Application	10.1146/annurev-statistics-040220-090158	Scopus	Potentially relevant
A principled stopping rule for importance sampling	Agarwal M.; Vats D.; Elvira V.	2022	Electronic Journal of Statistics	10.1214/22-EJS2074	Scopus	Potentially relevant
A double-sequential sampling scheme	Hu J.	2022	Communications in Statistics - Theory and Methods	10.1080/03610926.2020.1860225	Scopus	Specific indication
Special feature: Recent statistical methods for survival analysis	Emura T.; Ha I.D.	2021	Japanese Journal of Statistics and Data Science	10.1007/s42081-021-00140-0	Scopus	Potentially relevant
Comparing methods of randomizing Sobol' sequences for improving uncertainty of metrics in variance-based global sensitivity estimation	Sun X.; Croke B.; Roberts S.; Jakeman A.	2021	Reliability Engineering and System Safety	10.1016/j.res.2021.107499	Scopus	Potentially relevant
CU-MSDSp: A flexible parallelized Reversible jump Markov chain Monte Carlo method	Chavis J.T., III; Cochran A.L.; Earls C.J.	2021	SoftwareX	10.1016/j.softx.2021.100664	Scopus	Potentially relevant
